NHS Scoring Guidance

Recent guidance issued by NHS England has confirmed the move away from the 'Net Promoter' scoring methodology to a simpler 'Percentage Recommended' and 'Percentage Not Recommended' method.

The percentage measures are calculated as follows:

$$\text{Recommended (\%)} = \frac{\text{very good} + \text{good}}{\text{very good} + \text{good} + \text{neither} + \text{poor} + \text{very poor} + \text{don't know}} \times 100$$

$$\text{Not Recommended (\%)} = \frac{\text{very poor} + \text{poor}}{\text{very good} + \text{good} + \text{neither} + \text{poor} + \text{very poor} + \text{don't know}} \times 100$$

For further information about the selection of the scoring method please see the NHS FFT Review published in June 2014 here:

- ✓ Even though the new system to book an appointment is great and I did get an appointment the following day. It was hard to find the right option when booking online. I had to try three times until I got the right option. It's sometimes a nicer option to speak to a human. Especially, like me at the time, full of grief and trying to work things out when your head is not in the right place doing things online can be a harder option.
- ✓ *I was seen on time by a very helpful and polite doctor*

- ✓ *It was fast and efficient but it was also a simple appointment*

Not Recommended

- ✓ *The new system is just hard work to get an appt with the doctor you either want or the doctor that's asked to see you again, wait times in the surgery are still just as long as before i feel the new system of rapid health hasn't done much benefit*
- ✓ *Because your website is not clear regarding trying to book an appointment through e consultation. It's not clear where to click for it. Also at the end you send an email and NOT a telephone call. This is most unhelpful because we can easily accept the phone call. But a person does not always have their personal emails open and I did not realise you sent me an email to book an appointment. This should be changed please or go back to the old system where we waited in the queue to speak to reception to request an appointment*
- ✓ *The automated appointment message was wrong. Said mum had a gp appointment at the surgery when it was a phone call. Spent an hour trying to get through to get this confirmed in one minute. Waste of my time.*
- ✓ *This new system is absolutely shocking can't get a appointment with the doctor you actually want anymore then cannot get an appointment for weeks because someone else has decided it's less important than others when that's completely unfair Urgent on the day appointments used to be helpful but now your left waiting days for antibiotics because you cannot get an appointment I like my children and myself to see Dr okeze because she's been our GP for years and she knows my children's disabilities already but now I cannot get one with her and my son won't attend appointments because he has autism without his set doctor he refuses to talk*

Passive

- ✓ *Because i had to wait for 40 minutes past the time of my appointment without any explanation Asti why this was happening. I was in a great deal of pain with my knees and had to walk round the reception area to relieve the pain.area*
